Ltr to BP on Spill 140326 draft.docx

Hey Ronna,

Glad to hear you connected with Kalina, she's great! I will happily let others know to reach out to you in the future. Additionally as an FYI, attached is a letter circulating here in DC to the CEO of BP asking about the spills and their response.

All the best,

Dylan

Please do ask if you need anything, and I'll keep you posted if we have any further info to share.

I talked to Kalina. Thanks for sharing my info and feel free to do so in the future.

Hi, Dylan.

Here's what we know:

The U.S. Environmental Protection Agency is responding to the spill of an unknown volume of oil into Lake Michigan from the BP refinery in Whiting, Indiana. BP notified the federal government's National Response Center on March 24, 2014 at 5:25 p.m. that a spill had occurred.

EPA has issued a Notice of Federal Interest, which formally advises BP of the federal government's involvement in the spill and directs the company to conduct a cleanup. Under EPA oversight, BP has deployed more than 2,000 feet of boom to contain the oil. In addition, the company has used vacuum trucks to remove about 5,200 gallons of an oil/water mixture from the spill location. BP crews also are combing a nearby company-owned beach for oil globs and conducting air monitoring to ensure the safety of the public. The U.S. Coast Guard has flown over the area and has not observed any visible sheen beyond the boomed area.

EPA will continue to work with the U.S. Coast Guard, the Indiana Department of Environmental Management and BP to take measures to contain and clean up the oil. At this point there is no

estimate of cleanup cost or duration.

Please let me know if you have any questions.

Hey Ronna,

Hope all is well! I recently read about the malfunction at the BP Whiting Refinery. I was wondering if you could shed some insight and information about the malfunction and what is being done to respond to the spill.

All the best,

Dylan
